Azure DevOps Engineer

Context of the function

We are looking for a dynamic and creative 'Azure DevOps Engineer' whose proposals and implementations should help our products to be deployed faster and with higher assurance, allowing us to deliver the best quality of service to our customers in terms of time-to-market and availability.
As a member of an Agile tribe, you will play a central role in designing and implementing the Azure DevOps flows.
Portima recently started its journey to become a cloud first company, embracing the agile methodology and DevOps philosophy.

Role Description

- As a DevOps Engineer, you are co-responsible for automating application deployment on Azure infrastructure platform (including automation of infrastructure, software and databases)
- Make design and technical decisions and provide suggestions to implement the adequate DevOps flow.
- Improving gradually CI/CD tooling by finding the most appropriate solution in collaboration with your colleagues.
- You participate proactively on the operational management of the platforms, to prevent and solve the potential performance issues, to ensure the availability of the systems.
- You provide solutions for both the Platform and Application squads, so that they become more efficient and can start taking over a part of DevOps activities.
- You participate actively in knowledge and practice sharing, across the enterprise, and aim at synergies between teams.

Qualifications

- Minimum Bachelor's degree required. Preferred fields in engineering or computer science.
- Minimum 4 years relevant work experience in Agile and DevOps in Microsoft Azure.
- Good knowledge and experience with the Azure cloud stack (including Azure Kubernetes services and PaaS solutions).
- Proficient in scripting (Powershell), and Git workflows.
- Basic knowledge of programming languages (C#) and REST APIs
- Good knowledge of MS SQL administration and proactive maintenance activities
- Critical thinker and good problem-solver (root cause analysis)
- Good communication skills, and able to share your knowledge with others.

- ✎ You are able to adapt quickly to a new environment in which requirements evolve rapidly.
- ✎ You are a native Dutch or French speaker, communicating fluently in English. Understanding of the other national language is a plus.

Nice to have

Jira/Confluence, Kubernetes, Istio, Terraform, SonarQube, Microsoft API management platform, Automated tests, Blue/Green deployments.

About Portima

Portima is a digital services company. We provide digital solutions and IT services to the community of insurance brokers, insurance companies and to the customers of the brokers.
