

Network Engineer

Goal of the Function

Technically design and maintain our network infrastructure as well as implement and configure appliances on premise and in the Cloud environment to contribute to a consistent and secure infrastructure and improve the efficiency and security of Portima.

Role Description

- 🕒 Support managing network security aspect of our environment (Checkpoint, Fortinet,...)
- 🕒 Follow up maintenance of Portima's network appliances (coordinating with external partner Savaco) – security updates patching.
- 🕒 Transform access network to stop ISP services.
- 🕒 Follow up Ivanti Pulse Secure appliances migrations.
- 🕒 Configure and support a new corporate network with Performant WIFI.
- 🕒 Reduce costs by removing “obsolete devices.”
- 🕒 Remove all obsolete network appliances (F5, Firewalls, Switches,...)
- 🕒 Further develop and optimise our Cloud by making changes, upgrades and extensions in order to continuously improve and adapt the Cloud environment to the needs of the users and/or Portima.

- 🕒 Design and implement automated monitoring and alerting systems to respond effectively based on prioritised notifications and proactively detect network and network security failures.

- 🕒 Write documentation on installation and configuration processes, incidents and updates to provide a good basis for simplifying adjustments to network infrastructure and ensure knowledge sharing.

- 🕒 Stay up to date with developments in the field of activity by consulting the necessary sources of information, both internally and externally, in order to strengthen credibility by offering a service based on up-to-date knowledge and by anticipating market and technical developments.

Qualifications

- ✍ Minimum Bachelor's degree required. Preferred fields in engineering or computer science.
- ✍ Good knowledge and experience with the different network and network security components used by Portima
- ✍ Critical thinker and good problem-solver
- ✍ Good communication skills, and able to share your knowledge with others.
- ✍ Able to adapt quickly to a new environment in which requirements evolve rapidly.
- ✍ Native Dutch or French speaker, communicating fluently in English. Understanding of the other national language is a plus.

Nice to have

Jira/Confluence, Fortinet, Checkpoint, Cisco, Ivanti,
